Privacy Statement

What are cookies?

'Cookies' are small text files that are stored by the browser (e.g. Internet Explorer or Safari) on your computer or mobile phone. They allow websites to store such things as user preferences. You can think of cookies as providing a "memory" for the website, enabling it to recognise a user and respond appropriately.

Anonymous analytics cookies

Every time a user visits our website, web analytics software provided by a third party generates an anonymous analytics cookie. These cookies tell us how many users visit the site each day. These cookies cannot be used to identify individuals or personal information.

Personal information will only be collected when you email the Richard Jefferies Society. Where you voluntarily choose to give us your personal details, it will be used exclusively for providing you with information or services you have requested.

Other third party cookies

On some links, third parties may also set their own anonymous cookies, for the purposes of tracking the success of their application, or customising the application for you. Because of how cookies work, we cannot access these cookies, nor can the third parties access the data in cookies used by this website.

How do I turn cookies off

You can restrict or block cookies through your browser settings. The Help function within your browser should tell you how. Alternatively, visit www.aboutcookies.org. For information on how to do this on your mobile phone, refer to your manual.
